

Eclipse Animal Behavior

Learning objectives: organisms and environments: observing, recording data

- TEKS 112.3B D,E observe organism and environments and record data
- TEKS 112.18 et al. descriptive observations, collect, record and analyze data

Supplies: data chart, binoculars if available, reference books or applications to identify species.

Activity: Observe animals and birds in your eclipse observing vicinity.

Record any “evening type” activities observed (birds roosting, dogs settling down, crickets, etc).
Use sample data chart on next page.

Note: estimate the “fraction of the Sun covered” but then afterwards get the best information from <https://timeanddate.com/eclipse> .

Analyze: What was the maximum solar coverage at your site? Did it seem to get dark to you?
